Hello Qualicum School District Board of Education Members,

Thank you for any and all your efforts to make sure community members are provided all the relevant information regarding the facilities review and the recommendation to close a school in the QSD(69).

Just to make sure that community members are working with the same data that you are, could you make sure that all the data that was used by the consultant is provided to the community. Data can be made available online via the QSD69 webpage.

This would include, but is not limited to, catchment area boundary files (shapefile please), catchment area enrolment since 1983, and all the inputs used in running the funding formula, with reference to methods papers.

Your dedication to providing the best education experience for all the students as well as your dedication to making sure community members are provided all relevant information is very much appreciated.

Warren Munroe
