Dear Ms. Stilwell,

I write to you to invite you again to visit the Population Projection Project for Canada's census areas and to ask for your assistance in adding information to my record of employment, as well as to consider an easily implementable way to improve the quality of BC Public Service agencies' services - verify that correct methods and data accompany "findings" rather than incorrect methods and data accompanying "unfounded numbers".

Attached is a copy of the letter sent to you December 11, 2014 letter, also online at <http://wminfomatics.com/WP/index2.html>

Cordially,

William Warren Munroe
